

99Sounds proudly presents **Antigen**, a free collection of drones, alien noises, soundscapes, and sound effects crafted by Dronny Darko. Antigen takes us on a sonic journey well beyond the humanity's habitable zone.

The library's sound palette is entirely foreign. Antigen invites your imagination to render its own patterns of situations that may be happening in these outlandish-sounding audio clips. The author only gives us a few hints within the titles. The rest is given to us to explore while diving deep into the unknown and unsettling sound design territories.

Contents

47 soundscapes

24-bit WAV format

1.41 GB download size

1.32 GB size on disk

ZIP archive

LICENSE

The included samples were crafted by Dronny Darko and are royalty free for use in your music, video game development, videos and other creative projects, both free and commercial. You are not allowed to redistribute these samples (as in share or sell them on other websites), nor use them as the sound source in audio related software and/or sound libraries, free or commercial.
